SUMMARY

As an early-stage computer science engineering graduate, I eagerly embrace new challenges and opportunities to broaden my skills. I'm now excited to embark on a rewarding career with a respected organization.

EXPERIENCE

Software Developer Intern

CraftIndika August 2023 - Present, India

- Contributed to the development of the Frontend UI using Next.js, Tailwind CSS, and open-source libraries.
- Successfully integrated the Frontend with the backend using the Medusa.js framework.
- Utilized modern web technologies to improve user experience and application performance.

Software Developer Intern

Tatvasoft August 2023 -September 2023, Ahmedabad, India

- Responsible for a cutting-edge full-stack web application using the latest technologies like Node.js and React.js.
- Empowering customers to effortlessly peruse, search, and reserve books.
- Elevated the application's functionality to strategically enhance the user experience, resulting in a more agile and efficient reservation process.

EDUCATION

Bachelor of Computer Science and Engineering

Gujarat Technological University, • India Ahmedabad, • India • 2024 CGPA 8.61

Higher Secondary Education in Science

Alpha High School, • Junagadh Gujarat, • India 2020 • 82.46%

PROJECTS

Portfolio

Personal project • <https://devmuliya.vercel.app/> • April 2023 - April 2023

- Designed and developed a dynamic portfolio website using Next.js and Framer Motion, blending coding expertise with captivating animations.
- Improved user engagement with eye-catching animations powered by Framer Motion.
- Ensured a responsive design to optimize user experience across different devices and screen sizes.

Shopify

Personal project • <https://shopify-now.vercel.app> • February 2023 - February 2023

- Developed an e-commerce platform using Next.js, Node.js, Tailwind CSS, and Framer Motion, featuring dynamic routing and server-side rendering.
- Accomplished user authentication for registration and login, enabling users to place orders and manage their shopping cart.
- Created an admin dashboard for product registration and efficient order management, including status tracking (pending, dispatched, delivered).
- Utilized smooth animations with Framer Motion, enhancing user experience and making the platform feature-rich and engaging.

Talker

Personal project • <https://talker.onrender.com> • December 2022 - January 2023

- Developed an intuitive chat application using ReactJS and Node.js, ensuring real-time interactions and a smooth user experience.
- Implemented responsive styling with TailwindCSS and enabled lightning-speed communication through Socket.io.
- Ensured data security by securely housing conversations in MongoDB and added email security layers using Nodemailer with OTP.
- Enhanced user engagement with features like custom statuses, emoji reactions, and a user-friendly search, promoting connections with application.

CERTIFICATIONS

Introduction to git and github

Coursera • 2023

Proficiency in essential version control tools, for collaborative software development.

SKILLS

Front End: Reactjs, Nextjs, TailwindCss

Languages: C++, Java, Javascript, Dart

Web Concepts: API Integration, Asynchronous Programming, Ajax

Back End: Node.js, express.js

App Development: Flutter

Database: SQL, Mysql, No-SQL, Mongoddb, Firebase.
